FLOATING DOCK AND LIFT SYSTEMS

www.ez-dock.com
800-654-8168

EZ DOCK HUMMER STRONG

The patented flotation design and coupling system of EZ Dock provides more stability than traditional floating dock structures, and is virtually unsinkable under normal use.

Why EZ Dock?

IT'S EASY

EZ Dock was developed with the discriminating waterfront consumer in mind. After years of battling harsh weather conditions and having to install and remove docks seasonally, two innovative friends invented and patented the EZ Dock system that changed the dock industry forever. Backed by further engineering and development after joining the PlayPower family of companies, EZ Dock systems are the strongest and the most stable plastic floating dock and lift systems on the market.

Today, more and more people have turned to EZ Dock for their residential and commercial uses, making it the industry leader in polyethylene docking systems and accessories.

VERSATILE

No two waterfront properties are exactly the same, so why not choose the versatility of the EZ Dock modular system that can be configured to meet your waterfront vision. The modular dock sections even allow you to add dock pieces later, or reconfigure your dock layout as your needs change. EZ Dock's EZ Designer™ online configuration software at www.ez-dock.com allows you to create your own system and get a quote on your design from a dealer near you who can recommend a suitable anchoring method. When you finish your dock design you can add PWC or boat lifts, benches storage or even, a roof system.

EZ Dock, Incorporated is not associated with General Motors Corporation and General Motors Corporation did not participate in the above demonstration. **WARNING:** EZ Dock, Inc. performed the depicted maneuver to demonstrate its product's buoyancy and weight capacity. EZ Dock does not suggest that its products be used as a form of flotation for automobiles, and specifically advises that automobiles should not be driven onto its docks.

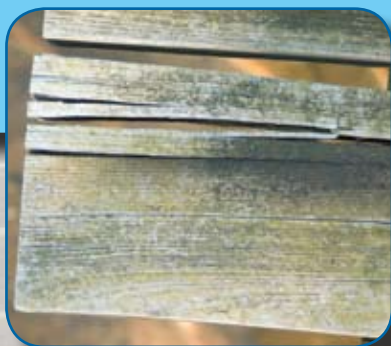

EZ Dock vs. Wood

While there are many advantages of EZ Dock over traditional wood docks, the most significant is reduced maintenance, which can be measured in both time and money saved. EZ Dock sections don't rust or splinter, nor do they have individual boards that need to be replaced or painted. Pressure washing is a thing of the past with EZ Dock. Soap and water from a traditional garden hose are all you need to clean your EZ Dock system.

Additionally, EZ Dock is environmentally friendly as it allows sun light to filter through and it will not release harmful chemicals into waterways as treated lumber can often do.

From a comfort standpoint, the light color of EZ Dock makes it cooler than sun-baked wood with no splinters or rusty nails, so your bare-footed users will thank you!

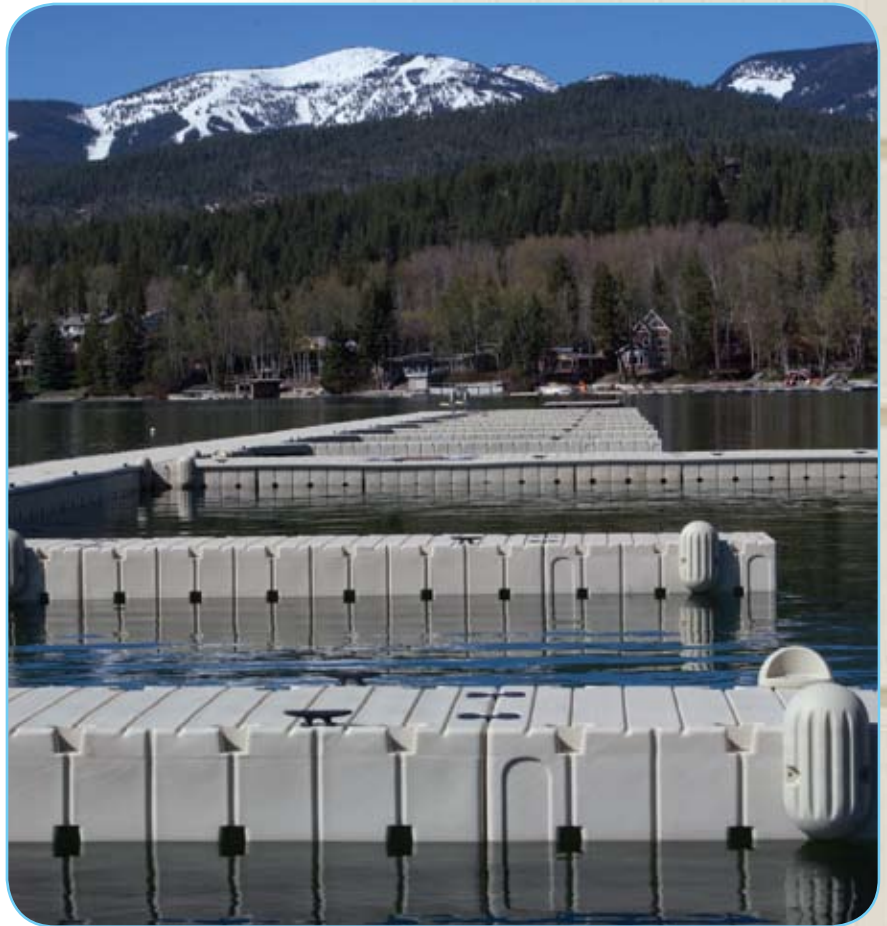

www.ez-dock.com

HIGH VALUE

EZ Dock knows that a stable, versatile and maintenance-free docking system is the most desirable. We also know that having a waterfront property, whether residential or commercial, is a major investment. EZ Dock products are attractive, easy to install, and virtually maintenance free. Overtime this saves you money resulting in a better long-term investment for the discriminating waterfront property owner.

For the best value, choose EZ Dock when replacing an existing dock or designing and installing a new one.

MAINTENANCE FREE

Take back your weekends! With increasingly hectic schedules, there are only so many days that are made for fun. Why waste your precious free time installing, pressure washing, nailing, staining, painting, and/or replacing damaged sections of your dock?

A hose and soapy water are all you need to maintain your EZ Dock system. And EZ Dock's light beige color is cooler than darker competitive products, so you don't have to find your shoes just to walk across your dock!

All EZ Dock products are in stock and ready to deliver, so most docks can be installed right away. With EZ Dock, you can start enjoying your waterfront leisure time the same day!

www.ez-dock.com

Applications

Dock Applications

A Solution for Every Situation

EZ Dock keeps research and development at the forefront of all we do. Our team consists of water enthusiasts who live, work and play on the water. We understand your challenges first-hand and develop solutions accordingly.

EZ Dock is an ISO certified company that uses state-of-the-art engineering and manufacturing processes to develop and deliver the highest quality dock products in the industry.

Residential /Property Development

Whether you have a lakeside cottage, oceanfront property or are involved with a homeowners association, EZ Dock can create a dock system tailored for your needs.

Let our factory trained distributor help you make sense of dock permits, local codes, environmental considerations and water conditions that may impact your ultimate design.

Marinas

Whether you need two slips or 2000, EZ Dock will team you up with a dedicated marine design engineer to help you navigate the process. We will help you understand the challenges that come with development or replacement while helping to ensure you meet all local codes and requirements.

With hundreds of successful marina projects to our credit, EZ Dock can offer you years of experience to help design and select products that will provide the best solution to your docking needs.

Restaurants

Increase profits with access for patrons arriving by boat, or provide close-ups of water views. EZ Dock will work with you to provide a safe and stable waterfront accessibility option for everyone. EZ Dock systems can be configured to conform to the latest ADA regulations.

EZ Dock keeps up with the latest trends and standards to give you options that make sense, increase traffic, and add to your bottom line.

www.ez-dock.com

Parks, Camps and Recreational Areas

Do you have fond memories of summer camp—swimming, fishing, canoeing, kayaking, sailing, and waterskiing? The team at EZ Dock does, and we have created numerous dock systems that provide children and adults of all ages EZ access, including ADA accessibility, to water activities we all love.

Our maintenance free systems are designed specifically for places that do not have full-time staff or capabilities to handle year-round maintenance needs. In most cases, EZ Dock can be left in the water all year, ask your local dealer for his expert recommendation.

Hotels / Resorts

EZ Dock has installed numerous dock solutions for hotels and resorts worldwide. These docks are used for fishing piers, PWC storage, boat rentals boat launches and boat shuttle points.

Contact your local EZ Dock distributor to get a free quote.

Government / Military

EZ Docks are currently in use for various governmental, military, and police security units worldwide. Whether your fleet consists of PWCs, RIBs, boats, or other watercraft, EZ Dock offers creative design concepts for EZ access to patrolled waters, while keeping budgets in mind.

www.ez-dock.com

Nature Preserves, Wildlife and Environmental Research

Wildlife habitats depend on our wetlands and we, in turn, need to respect their needs. EZ Dock sections allow light to penetrate through the dock, fostering plant growth that is essential to wildlife.

EZ Dock's designs utilize our patented hollow sections that eliminates the use of foam for flotation.

Foam can often be dangerous to wildlife when it deteriorates and breaks apart, leaving toxic pieces into the water. We develop our products to work in harmony with the environment – not against it. EZ Dock contains no toxins or other ingredients that could harm wildlife like treated wood or foam filled products can.

Special Events

Special water-front events that require floating platforms can present unique challenges. They demand considerable planning and attention to detail to make them fun, entertaining and safe for all involved.

EZ Dock understands this and can help you plan and provide for your special event with docks and floating platforms to accommodate judges, officials, contestants, performers, spectators, press, photographers, etc.

EZ Dock products easily install and dismantle and are perfect for traveling events held in various locations or that reoccur such as ski competitions, fishing tournaments, floating band stands, golf tournaments and in-water boat shows.

Rowing

EZ Dock makes a perfect platform for launching rowing skulls. The unmatched stability and flotation capacity allows for even the largest 8 person teams to safely and confidently carry their skulls to the dock edge for launching. Dock freeboard can be adjusted to the optimum level by adding or removing water ballast from the dock sections as needed.

www.ez-dock.com

Dock Sections

Corner Gusset Part# 300501

Polyethylene corner gusset adds deck surface and additional stability to dock fingers when needed.

Modular, Stable, Cool and Durable

Choose from many different sizes and shapes to get the exact dock configuration you desire. The patented EZ Dock system makes it a snap to install. Just lay out the sections, bolt couplers in place, and tighten down the bolts.

The beige color makes our docks more attractive, and helps them blend with the natural surroundings – but most importantly, it is cooler to the touch.

EZ Dock's patented flotation design creates suction and compression to increase stability. When you walk on an EZ Dock, you will immediately notice the difference. It's not just floating, it's actually creating stability by using the patented hollow chambers on the underside.

The patented connection couplers allow the sections to move independently under high-stress conditions, while still providing unified firmness. EZ Dock's polyethylene construction provides outstanding modularity, superb buoyancy, functionality, and safety. That makes for an extremely versatile dock system.

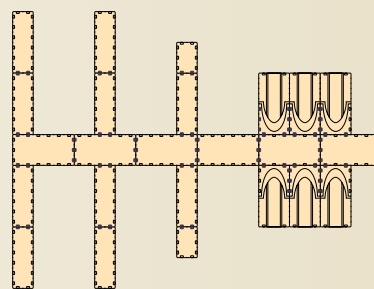

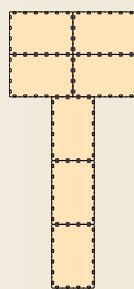

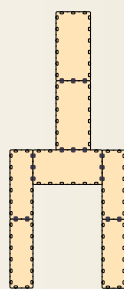

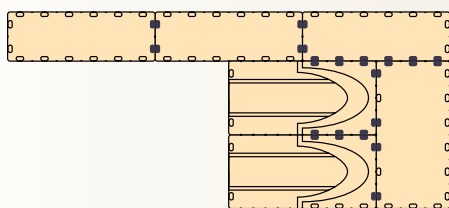

Use the EZ Designer™ Configuration tool to assist you in creating a dock that meets your needs. Your configuration can be stored or sent to the nearest EZ Dock distributor for pricing and anchoring recommendations.

Features & Benefits

- Excellent stability on water
- Low or virtually no maintenance
- Beige "cool-to-touch" color
- Safe, slip-resistant surface
- Strength and flexibility
- Secure connection couplers
- Versatile modular design
- Expandable for future growth
- Anchoring systems for all conditions
- Four-season accessibility
- Custom designs available

Versatile Modular Design

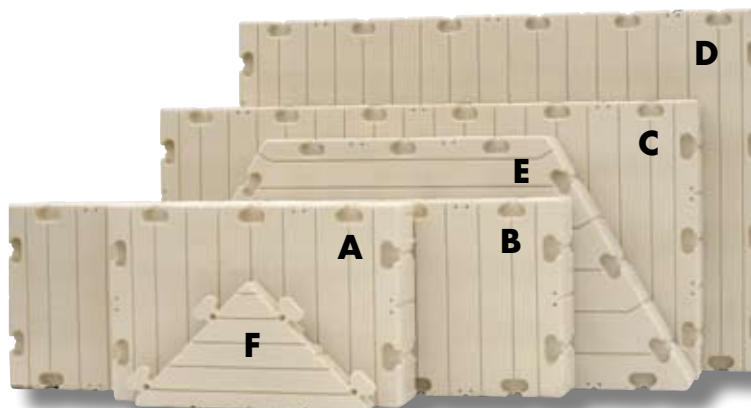

The EZ Dock system is easily configured to suit most any need. Combine various size sections and accessories to create a simple swim platform or an elaborate multiple-slip marina.

A view of the bottom and inside of an EZ Dock section reveals flotation chambers and an extra-heavy wall thickness that creates tremendous structural integrity. Placement of these patented chambers also enhances the EZ Dock's stability, making it the most stable dock on the market. The need for foam fillings and the environmental concerns related to them are completely eliminated.

Special connection couplers are designed to allow sections to move independently under high-stress conditions, yet provide unified stability. Made with recycled material, the couplers are compounded to prevent fatigue problems. The composite coupler bolt and nut eliminate rusting in all water conditions.

PWC Lifts

Idle Up and Roll Aboard

EZ Port revolutionized docking and launching with the original drive-on PWC lift. Still the industry leader, EZ Port is the simplest drive-on, push-off method of dry-docking. The raised bow stop serves as a safety feature that helps to prevent drivers from "overshooting."

There is no winching, cranking, pumping or hoisting necessary and its durability is the reason why EZ Port remains the number one PWC lift in the market.

Self-floating EZ Port moves with changing water levels and helps protect watercraft from damage caused by wind or waves. It is so simple to use that even beginner PWC operators will find boarding and launching a breeze, with foot space on both sides and the front to allow ample access and stability.

EZ Port installation requires just a few tools and very little time. You can use it with your EZ Dock system or with an existing traditional dock. Plus, EZ Port uses adjustable polyurethane rollers to help protect against scratching your PWC investment and to make it easier to dock and launch your watercraft.

Features & Benefits

- Adjustable rollers
- Safe PWC storage
- Safety bulkhead
- Three-sided accessibility
- Low maintenance
- Cool beige or silver color for the Sea Doo Port
- Tie up cleat

EZ Port II

EZ Port 3

Quick, virtually effortless launching and boarding.

EZ Port MAX, PWC Lift

NEW!

Take Your PWC to the

MAX

(patent pending)

The EZ Port MAX is EZ Dock's newest personal watercraft port/lift product. EZ Port MAX is a Port system that is **M**odular, **A**daptable and **eX**pandable. It is the first port of its kind to offer EZ on and EZ off inline parking for multiple PWC parking.

The diagrams to the right show just a few of the configurations that are possible with the EZ Port MAX. The EZ Port MAX can be used with standard EZ Dock, traditional fixed or floating docks or freestanding.

Features & Benefits

- **M**odular for multiple configurations to suit your needs
- **A**daptable to your waterfront situation and watercraft
- **eX**pandable to allow multiple in-line tandem configurations
- Entry sections may be used "head-to-head" for a drive-thru configuration
- One size fits all roller system
- Enhanced fit and form to match a wide range of watercrafts
- Integrated pipe brackets
- Wider and higher hull "cradle"
- Lower entry roller for EZ approach and softer entry
- Easy loading and unloading

Multiple Color Options

Small bow section is removable or fixed mounting

Oversized shaped rollers eliminate the need for adjustment

Full bow section for mounting to your EZ Dock

MODEL	SIZE	WEIGHT	FLOTATION CAPACITY*	PART #
EZ Port Max Entry	149" x 60" x 11"	315 lbs.	1380 lbs.	206030PW
	3.78m x 1.5m x 28cm	142.8 kg.	626 kg.	
EZ Port Max Extension	146" x 60" x 11"	328 lbs.	1400 lbs.	206031PW
	3.71m x 1.5m x 28cm	148.8 kg.	635 kg.

Drive-On Boat Lifts

EZ Port IV

EZ Port IV with storage unit

Storage

Create a place for your boating gear. Add EZ Dock's bulk head storage bin to your Port IV for storage, winching, or just to create a barrier.

Extension

Add an extension or two depending on the length of your boat to increase the flotation capacity of the lift.

EZ On and Off

The Port IV makes lifting boats EZ. No mechanical action or external power required. Just idle up and roll aboard. Port IV can accommodate many boat models—just ask your dealer for more details.

Lift for Your Horsepower

The EZ Port IV Boat Lift offers the same EZ drive-on docking and launching capabilities as a regular EZ Port for a PWC, but is made specifically for boats up to 23' (7m). It is the largest drive on port on the market and you can mount it to your current EZ Dock system, existing dock, or use as a stand alone.

Features & Benefits

- Flip up front cleat
- Sixteen optional roller positions to accommodate most boats
- Fixed position stern roller
- Three bed-way rollers with adjustable positions
- Safety bulkhead (forward stop)
- Optional bow/winch storage module

MODEL	SIZE	WEIGHT	FLOTATION CAPACITY*	PART #
EZ Port IV	168" x 80" x 15"	500 lbs.	1600 lbs.	208014PW
	4.25m x 2.0m x 38cm	227 kg	725 kg.	
48" Extension	48" x 80" x 15"	240 lbs.	400 lbs.	208014EX
	1.2m x 2.0m x 38cm	80 kg.	181 kg.	
24" Entry Extension	24" x 80" x 15"	100 lbs.		228014EX
	60cm x 2.0m x 38cm	45 kg.		
Supplemental Flotation	40" x 20" x 8"	20 lbs.	150 lbs.	208014FL
	1m x 1.2m x 20cm	9 kg.	60 kg.	
Bow/Winch	60" x 80" x 15"	250 lbs.		208014BW
	1.5m x 2m x 38cm	90 kg.		

*When attached to an EZ Dock product. Supplemental flotation available for specific applications.
Note: Because of the rotomolding process, weights and dimensions may vary. US Patent #398,576

**Items can be sold separately.

Winch-On Boat Lifts

After a Long Day on the Water

When your day of boating fun and sun has ended, pulling onto the EZ Dock boat lift is as simple as loading it onto a roller bed trailer. Simply idle up and winch your boat onto the lift. This lift will keep your boat high and dry - free from impacts, floating debris, algae and barnacles.

The EZ Dock boat lift system is engineered for most fiberglass V-style hull boats. Multiple adjustable rollers can accommodate boats with a 14 to 21 degree dead-rise angle. By positioning the rollers in four possible configurations on two trays, eight different heights can be achieved to suit your needs.

You can configure regular EZ Dock sections to create a horseshoe-shaped docking system for other watercraft including pontoons, catamarans and even seaplanes. Let us help you customize a system to fit your needs.

Features & Benefits

- Adjustable polyurethane rollers
- High-quality winch system
- Protective bow stop
- Modular intermediate section
- Sculpted stern section aids loading and unloading
- Low maintenance
- Cool beige color
- Boat launching strap (for specific applications)

Anchoring

Hold Steady Mate

Once you have created your EZ Dock, you will need to select an anchoring system to work with your existing piling or with your new installation.

Our wide-variety of anchoring components can accommodate most water conditions and bottoms (deep, shallow, rough, muddy or sandy), and are simple to install. EZ Dock anchoring products are made from long-lasting, durable materials that can accommodate from standard to heavy-duty demands. Your local dealer can help you select the anchoring system that is right for your location.

Pipe Augers

Part# 100255 or 100355

Auger with bolt and nut allows for drilling and setting pipe in lake, river, or ocean bottoms. Pipe sold separately.

Adapter Hinge

Part# 100750 or 100750SS

Reversible hinge allows you to bolt EZ Port PWC lifts or EZ Dock sections to other types of floating docks.

Stiff-Arm Heavy-Duty

Part# 800099

Anchor to a shoreline abutment or to a shoreline post with our heavy-duty stiff-arm. Light-duty stiff-arm bracket also available.

Heavy-Duty Pipe Bracket

Part# 210250 or 210350

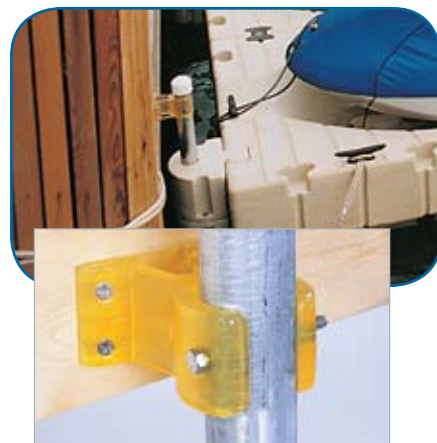

Heavy-duty polyethylene pipe bracket allows docks to adjust to changing water levels.

Pipe Bracket

Part# 130250 or 130350

Standard-duty polyethylene bracket provides ample anchoring for EZ Port PWC lifts, or for smaller docks in moderate conditions.

Pipe Stand-Off Bracket

Part# 1051000

Polyurethane bracket attaches top of pipe to stationary docks. Fits pipe from 2.5" (6cm) to 3.5" (9cm) O.D.

Deadweight Bracket (Large)

Part# 210350 and 100725P

Add a deadweight insert to our heavy-duty polyethylene pipe bracket to anchor docks in deep water or over rocky bottoms.

Deadweight Winch Insert

Part# 210350 and 100730

Deadweight insert and cable winch added to our polyethylene pipe bracket allow easy dock adjustment for water fluctuations. Cable sold separately.

Deadweight Bracket (Small)

Part# 100740 or 100740SS

For light-duty anchoring with chain and/or to attach 4" (10cm) x 4" (10cm) railing or mooring posts. Chain sold separately.

Deadweight Stiff Arm Combo Bracket

Part# 100700

This combination bracket can be used with both EZ Dock's deadweight or stiff arm anchoring system.

Piling Bracket

Part# 300800

Heavy-duty polyethylene bracket allows lateral position adjustment to attach to piles up to 18" (46cm) in diameter.

Piling Bracket and Hoop

Part# 100800

Mainframe piling bracket is pre-drilled for hoops from 4" (10cm) to 24" (61cm) wide. Includes connectors with nuts. Hoops sold separately.

www.ez-dock.com

Gangways

Gangway

Engineered with the same technology and quality as our EZ Dock sections, our gangways offer the same uncompromised durability and modular versatility. We offer gangways manufactured from aluminum, wood, or polyethylene (the patented version).

Polyethylene gangway available in 6-foot (1.82m) sections, that can be combined to lengths of 12 feet (3.65m) or 18 feet (5.48m). To compliment the gangways, railings are also available for added safety.

Gangway (Aluminum)

Part# 300310 to 500530

Gangway has welded construction with slip-resistant walkway, side curb, and rails. Lengths from 10'-30' (3m-9.1m), and widths of 3' (1m) and 5' (1.5m).

Transition Plate

Part# 300301, 400401 or 500501

Hinged aluminum plate with non-skid surface offers a safe and sturdy transition between shore grade and gangway.

Gangway Roller Kit

Part# 300300, 300400 or 300350

Gangway roller kit allows end of gangway to adjust with changing water levels. PVC roller for 3' (0.91m) and 4' (1.2m) length; galvanized steel roller for 5' (1.5m) length.

Poly Gangway

Part# 400406 (6' section)

Shown above with two 6' sections installed with the 12' Aluminum Tube Support Kit (Part# 401412) and optional 12' Hand Rail (Part# 400912)

Float Hinge Bracket

Part# 100650SS or 100850SS

Hinged bracket with hardware attaches gangway to dock. Available in 60" (1.5m) and 80" (2m) widths.

Gangplank Mounting Kit

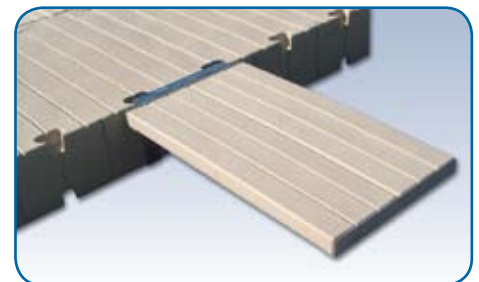

Part# 100240, 100340 or 100600

Galvanized steel hinge bracket and hardware, for wood walkways 24" (61cm), 34" (86cm), or 60" (1.5m) wide. Lumber not included.

Plank Gangway (Polyethylene)

Part# 200200

Hinged polyethylene panel creates a smooth transition between shore grade and deck surface.

Made in the Shade!

Now more than ever, we all need protection from the sun's harmful UV rays. You also need to shield your watercraft investments from the same harmful UV rays. Our EZ Dock roofing systems provide shade in the summer for boats, PWCs and the people who use them, as well as protection from the weather all year long. For maximum defense against ultraviolet damage, contact your local dealer to find out about colors and materials available. You can even add logos and text for commercial applications.

UV-8 inhibitor, the highest strength available, is used in all EZ Dock products. The thickness and light coloring of the product also enhance UV defense against sun damage.

www.ez-dock.com

Accessories

Accessories Make the Dock

You can add your own signature to your dock by adding an array of accessories from EZ Dock. To add your personal touch and accommodate your personal needs, choose from a wide variety of storage boxes, cleats, benches and ladders.

EZ Dock even has slides to entertain the kids - and has added safety features.

Most accessories can be used with existing docks, and are engineered for the low-maintenance and durability that you have grown to expect from EZ Dock.

The EZ Dock team continues to develop new accessories for your EZ Dock system and for existing docks made of other materials. We understand that you may want to add more trimmings later, so check out our website for the latest in accessories at www.ez-dock.com.

Swim Ladder

Part# 300260

One-piece polyethylene ladder is designed with no exposed hardware and 400 pounds of weight capacity. Slip-resistant textured surface offers maximum safety. U.S. Patent # 389,923

Dock Slide

Part# 300600

The EZ Dock slide adds a little fun for all ages.

EZ Stow Storage Box

Part# 300750

Permanently mounted and constructed of weather-resistant materials, the storage box is a great place to store life jackets, towels, and any other essential supplies.

Corner Storage Box

Part# 300755 or 300756

Roomy storage in a compact design that makes the most of available space without interfering with foot traffic. Connection boxes for complete utility hookups through this box are available. Shown with optional utility panel.

EZ Float Step Ladder

Part# 300270

Patent pending aluminum ladder with polyethylene float that keeps the ladder out of the water when not in use but is readily available when needed.

Polyethylene Bench Kit

Part# 300970 or 300965 without arms

A complete hardware kit that allows construction of a durable polyethylene dock bench.

Tie-down Cleats

Part# 300100

Tie-down cleats 8" (20cm) and other accessories attaché to heavy-duty stainless steel T-nuts molded in pairs around dock section perimeters.

12" Tie-up Cleat

Part# 300112

Supplemental Flotation

Part# 206013FL

Attaches under dock sections and EZ Port lifts to increase the flotation capacity in specific applications.

Dock Edging

Part# 400117

Constructed of durable vinyl, the edging provides a soft cushion to protect boats from the sides of docks and vice versa.

Dock Bumper

Part# 300180

The dock bumper is designed to protect the boat gunwales and rub-rails. Dock bumper will attach to dock using embedded T-nuts.

Dock Wheels

Part# 900050

Steel frames with polyethylene wheels make movement of docks easier. Sold in pairs.

Utility Channel Inside Corner

Part# 302030 or 302030SS

Utility conduit can be tucked neatly inside two-piece chaseway attached at junction of dock sections. Available with stainless-steel hardware.

Utility Channel Outside Corner

Part# 302040 or 302040SS

Convenient for installations in which dock layout requires utility conduit to be installed around the outside corner of a dock section. Available with stainless-steel hardware.

Utility Channel

Part# 302060 or 302060SS (60" Length)
Part# 302020 or 302020SS (20" Length)

Two-piece, 20" wide chaseway attaches to side of dock sections, allowing conduit for utilities. Available in 60" or 20" long sections, and with stainless-steel hardware option.

Security Curbing

Part# 35116

Constructed of polyethylene, curbing provides a safe border around dock edges for wheelchairs. (Available in brown only)

Corner Gusset

Part# 300501

Polyethylene corner gusset adds deck surface and additional stability to dock fingers when needed.

Corner Dock Wheel

Part# 300537

Help protect your dock from approaching watercraft with EZ Dock's new corner dock wheel.

Transition Kit (Polyethylene)

Part# 100717 (15") or 100718 (30")

Hinged polyethylene plate creates a smooth transition between EZ Dock or EZ Port and another floating dock.

Coupler Kit

Part# 301100

Standard coupler kit includes two couplers, one bolt, and one nut. Couplers are made from recycled material and are noncorrosive.

In-Water Installation Tool

Part# 9000010

Coupler installation tool simplifies in water connection of couplers.

Hardware Connector Male

Part# 201041SS

For attaching various accessories.

Hardware Connector Female

Part# 201041SS

For attaching various accessories.

Winch

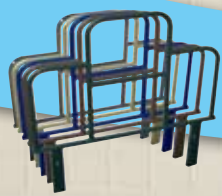

Part# 91400

Add EZ Dock's new winch to help stow your watercraft.

40" (1m) Width

Safe, Secure, and Code Compliant!

For commercial or residential uses, take comfort that EZ Dock modular railings conform to SOBA and ADA guidelines.

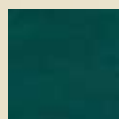

Railing sections are available in a variety of lengths and profiles designed to provide security with minimal obstruction. Choose from the standard hot-dipped galvanized finish, a powder-coated color finish, stainless steel or our new aluminum option.

Dock sections are 15 inches (38.1 cm) high and displace just a few inches of water, resulting in approximately 14 inches (35.56 cm) of freeboard height showing above the water line.

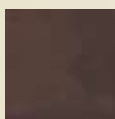

Available in five powder-coated colors:

Forest Green

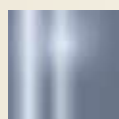

Brown

Royal Blue

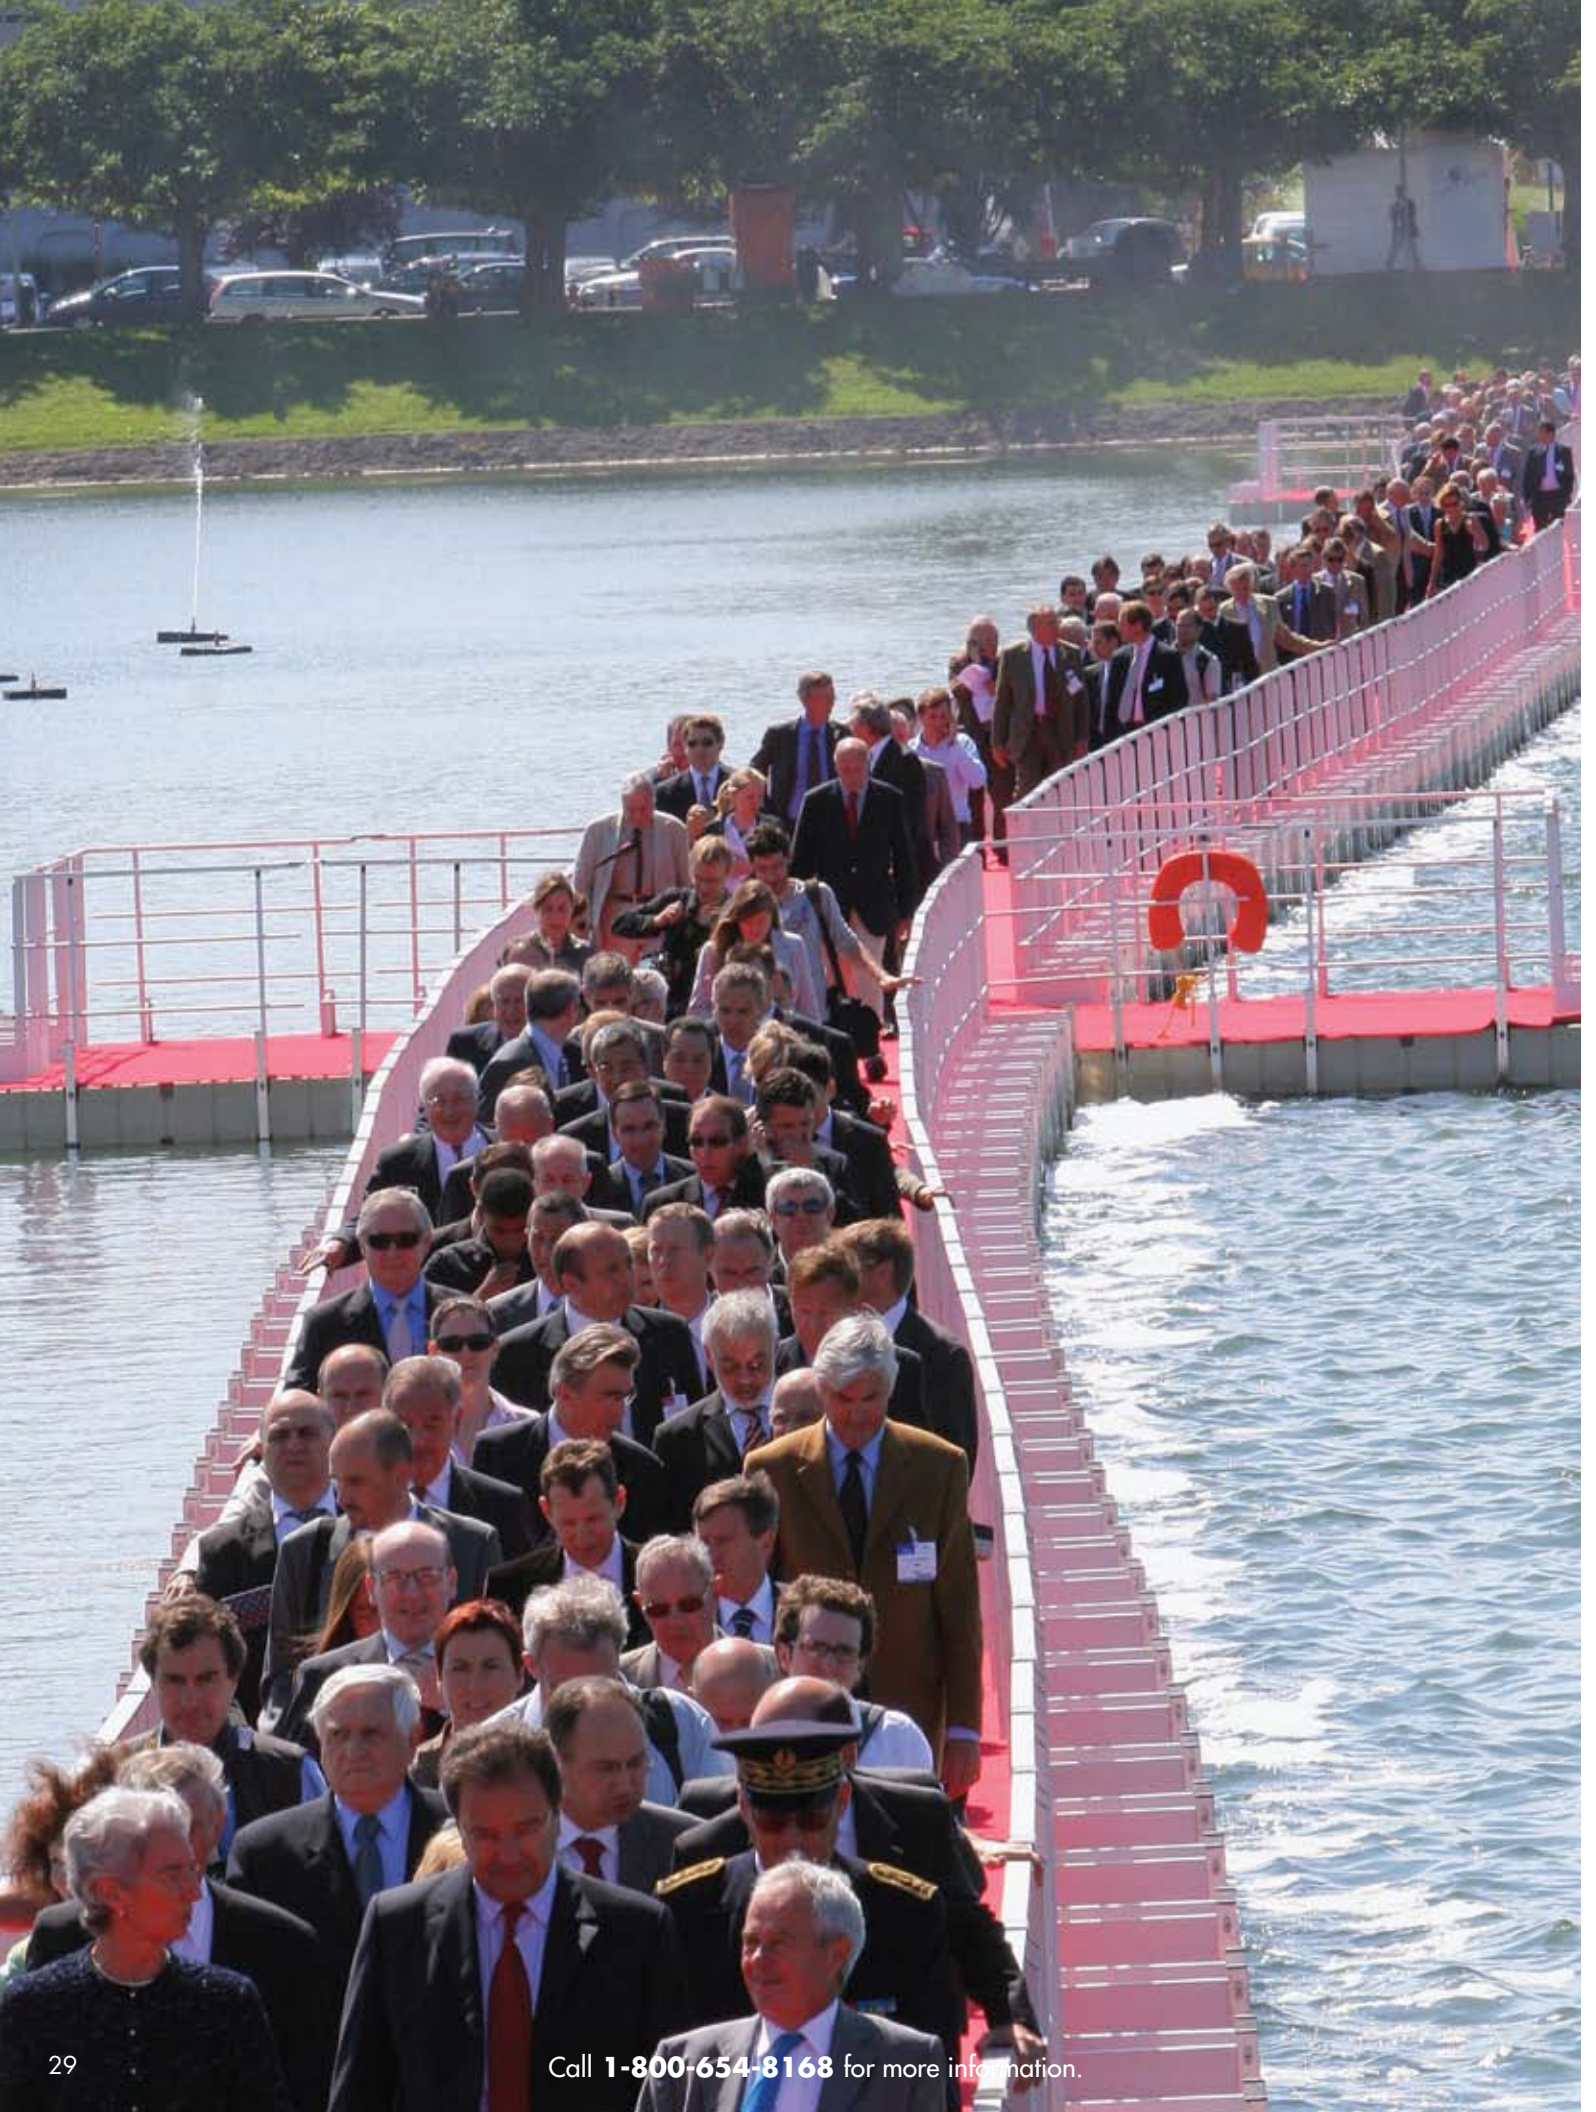

Sand

Stainless Steel
